

TRS-4

The Haeco TRS-4 Trim Removal System is designed to effectively remove left over trim on corrugated tabs and is completely adjustable for easy installation and setup. It eliminates the constant wear on the motors associated with the TRS-2 with an auto-start feature that shuts the motors off after 10 seconds of no product. Furthermore, the brushless motors eliminate the maintenance associated with the TRS-3.

FEATURES

- Higher RPM for more hits - 400/sec
- No more brushes
- More robust shafts and bearings
- 48VDC servo motors produce optimal power with minimal cost and are a direct drop in for the TRS-3
- Motor direction switch
- Reverse polarity protection when used with TRS-2/3
- Center-justified thumb screw flap adjustment (retrofittable to TRS-2/3)
- Add up to 2 extra motors for heavy boards or increased efficiency
- Improved strap hub design
