

The VELO glue station is a non-contact gluing solution similar to HAECO's DURO glue station, but with the added benefit of non-contact valve performance. It is uniquely designed to work with low pressure glue supplies, yet is also adaptable for high pressure glue supplies.

FEATURES

- High performance dot mode at selectable line speed threshold
- Pattern angle adjustment to match tab angle
- High speed non-contact valves capable of 350 cycles/second
- Quick pattern width adjustment
- Quick top-down/bottom-up changeover
- Optional integrated automatic nozzle tip sealers
